

You want more?

More responsibility, more output, more success?

Experience real satisfaction working in a dynamic team and global market leading companies. Imagine watching your efforts being designed into some of the high technical projects on the planet.

Then you have come to the right place. With 4,800 employees at various locations and a range of products from circuit boards to passive & electromechanical components and solar technology, we are right at home in many growth markets, and can offer you the best opportunities for furthering your career.

EMC & Inductive Solutions

Technical Sales Professional Norway

Your job

Following an extensive training period you will be the first sales man in Norway area. As the direct contact person and on-site technical consultant, you will be in charge of a small existing customer base and work actively to recruit new customers. For someone like you, being involved in developmental work is both a challenge and an incentive.

**Your professional
background**

- Technical training
- Ability to communicate and prior experience in sales
- Motivated lateral hires from technical areas are also welcome
- Ability to work independently
- Persuasive, dynamic personality
- Familiarity with the industry is an advantage

Your opportunities

You will take over a job with responsibility in a truly future-oriented industry. Supported by a qualified internal administration, you will have the opportunity to participate actively in the growth of our company. We will offer you a salary that is based on performance and oriented to success, along with the benefits you would expect from a modern company.

Your application

Martin Danielsson looks forward to receiving your application. Please indicate your earliest possible entry date and your wage expectations.
